Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 2-10, 21-23, 25-37 and 39-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shartle et al., Columbus, Subramanian et al. or Cottingham.

See the appropriate paragraph of paper 10.

Response to Arguments

Applicant's arguments filed 1/13/06 have been fully considered but they are not persuasive.

Applicants' argue the cited art uses a combination of capillary force and other forces to move the fluid and cannot be read on the instant invention that exclusively uses capillary force. These remarks are not commensurate in scope with the instant claims that are open and do not exclude the use of additional forces to move the fluids. The instant claims are directed to an apparatus and the method of intended use of the apparatus is of no patentable moment. Applicants' "exclusively by capillary force" seems to be a method of intended use and does not structurally define over the art of record.

Applicants' traverse the application of In re Boesch stating the Offices' position that claimed angular orientations, grooves, etc. are result effective variables is unfounded as the case is related to different facts. The Office maintains the angular orientations, grooves, etc. have well known and expected result and qualify as a result effective variable. If Applicants' believe they achieve unexpected results from their claimed limitations and can supply a timely and convincing 1.132 Declaration showing these unexpected results, this rejection would be overcome.

Allowable Subject Matter

Claims 11-20 are allowed.

Claim 24 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 1743

The following is an examiner's statement of reasons for allowance: In addition to the remarks of record, the cited prior art fails to teach the claimed device having a vent on each channel and/or the claimed bust film valve.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
